## Analysis on Curriculum related feedback

### Program: M. Sc. (Biotechnology)

To improve the curriculum offered to the students, regular feedback procedure is conducted. The feedback from different stakeholders: students, faculty members, employers, parents and alumnae provide important inputs for the curriculum- enrichment. Feedback on teaching learning process, curriculum aspect, curriculum design and development, campus facility and other related parameters are taken into consideration.

Any Suggestions:

The industry-academia relationship can be strengthened by universities and industries collaborating on mutually agreed projects.

This way, the industry can ask the university to work on say, a production or HR or process problem with a team of professors and students who can then use their academic knowledge to solve an industrial problem. Such projects should be time bound and the feedback obtained from the industry should be further used to offer better solutions. Subsequently, such solutions can be shared with other industries having similar problems.

The same process should be applied to national and global level problems. For example, B Tech students should be encouraged to find cost effective solutions for detection of COVID symptoms and supply of oxygen to needy patients in collaboration with the industry. Subsequently, good and effective solutions can be commercialized and offered at cheaper and affordable prices to the masses.
